### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 8-11, 18-20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanack et al (6,263,034).

Regarding claims 1, 8-11, 18-20 and 22, Kanack, as shown in figure 2, teaches a method and apparatus for extracting bit values from an incoming bit stream comprising detecting transitions of the incoming bit stream (50, 52, 46), determining relative phase (54, 42, 48, 56, 60), determining average phase (58, 62) and sampling the incoming bit stream (50, 52, 46). See also column 3, line 58 to column 5, line 27.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 2611

4. Claims 2 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanack et al (6,263,034).

Regarding claims 2 and 12, kanack teaches all subject matter claimed except for specifying that the incoming bit stream comply with the USB 2.0 interface standard. See explanation of paragraph 2 above. However, the USB 2.0 interface standard is well known in the art of data transfer. Moreover, the invention of Kanack is also for reducing jitter in transferring data. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the apparatus of Kanack to process the signal stream complying with the USB 2.0 interface standard since USB 2.0 is just one of the communication standard for transferring data.

## Allowable Subject Matter

5. Claims 3-7, 13-17 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References Baba (6,556,640), Noguchi et al (US 2003/01652070), and Mukherjee et al (6,760,389) are cited because they are pertinent

Art Unit: 2611

to the method and apparatus for extracting bit values from incoming bit stream by detecting the transitions.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on MON - FRI (9:00-6:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
